The Assessment Capacities Project (ACAPS) an international organization based in Geneva, which provides tools, know-how and training to a wide range of humanitarian actors.
GLOBAL EMERGENCY OVERVIEW
Global Overview

Snapshot 29 April – 06 May

In Syria, fighting between the Government and opposition groups continued in all governorates apart from Tartus and As-Suweis. Following a large scale offensive by the Government initiated on 28 April, heavy fighting has been reported in and around Damascus. Clashes in Eastern Ghouta forced the closure of Damascus international airport. Approximately 6.8 million people are in need of humanitarian assistance in the country while some 4.25 million people are displaced and over 1.4 million people have fled into neighbouring countries.

The humanitarian crisis sparked by the war struggle currently unfolding in the Central African Republic is now affecting the entire population of the country, some 4.6 million people of whom 2.3 million are children. Throughout the country and in the capital Bangui, clashes between armed factions and looting are increasing insecurity that is significantly hampering humanitarian access. As of 3 May, an estimated 39,000 people have fled CAR to seek refuge in the Democratic Republic of Congo, Chad and Cameroon.

Military operations between warring parties have intensified in Sudan’s Darfur and South Kordofan. In Southern Darfur, renewed tribal fighting between the Zaghawa and Bani Harmala tribes over land ownership and military operations of the Government forces against rebel groups have led to the displacement of thousands of people over the past few weeks. In South Kordofan, although ceasefire negotiations between the SPLM/A rebel group and Khartoum are ongoing, military operations continue to contribute to the displacement of populations.
Informing humanitarians worldwide.

ReliefWeb has been the leading source for reliable and timely humanitarian information on global crises and disasters since 1996.

Timely Reliable Humanitarian Updates

ReliefWeb is a specialized digital service of the United Nations Office for the Coordination of Humanitarian Affairs (OCHA).
